INTERESTS

Product marketing · Data analysis · Growth and business development · Social media marketing · Community management

Batool Al-Atrash

Internship application | Trifid Media Jordan

I build things, bring people on board, and leave work better than I found it.

PROFILE

Third-year Digital Business student at Al-Quds University, in a dual studies program (German model) that alternates three months of study with three months inside a company. I have built a member database and dashboard, a web system that replaces paper requests, and the prototype of a university website that the university drew on for its official mobility site. Palestinian and Jordanian, bilingual, creative, at ease with people and with data. I am applying to Trifid Media Jordan because it gives young people the right environment to be creative and to innovate. I want to learn inside the team and help it grow, rotating through its departments across several training periods.

EXPERIENCE

Digital Business Trainee — Dec 2025 – Present
Bethlehem Chamber of Commerce and Industry, Palestine

- Built a member database and dashboard in Python so staff see members and activity in one place: the same habit of tracking users and numbers that growth work needs.
- Helped design a web system to replace paper-based membership requests.
- Digitized paper records and took part in field research with local businesses on the Old Street revival.

Administrative and Digital Trainee — Aug – Sep 2024
Al-Quds University, Palestine

- Designed the Internationalization website prototype, with partner institutions and student stories; the university drew on it for its official mobility site.
- Organized seminars and photographed them; archived partnership contracts; welcomed and advised new students.

Media and Journalism Exchange — Jul – Aug 2024
Al-Balqa Applied University, Jordan

- Three weeks on media, storytelling, consumer psychology and audience hooks (why the first seconds of a video decide everything); took part in the Media Without Hate workshops and presented to mixed groups on tight deadlines.
- Visited Jordan Television, the Jordan Media Institute and Roya.

Trainee — Mar – Jun 2024
Non-profit organization, Palestine

- Built an Excel inventory system for storage warehouses to keep stock accurate.
- Helped prepare funding proposals, from problem to budget; organized beneficiary case files in a digital database.

EDUCATION

B.A. Digital Business, Al-Quds University — Expected 2029
Dual studies program: eight training periods, three completed, five remaining

Exchange Semester, Universitat Rovira i Virgili — Reus, Catalonia
Lived in Barcelona; International Marketing and Human Resources

Why Trifid

A note to the team, and a plan for my five training periods

Dear Trifid team,

Trifid gives young people the right environment to be creative and to innovate, and that is exactly where I want to grow. You make content, build websites and run campaigns under one roof, in a team with an average age of 23, and you have a home here in Jordan. I have been away from Jordan for too long, and I would love to learn here.

I study Digital Business at Al-Quds University in a dual studies program: three months in class, three months inside a company, eight periods in total. I have done three. I am asking for the next five, rotating through your teams until I find the one that is mine.

I will be honest about where I am. I am entry level in content creation, I can design posts and work in Photoshop, and I learn fast. I have built a dashboard, a web system and a website prototype. I love working in a team, I negotiate well, and one of my strengths is communicating clearly and helping others find solutions to challenges.

I would be glad to talk, and even if the timing is not right, please write to me. I am happy to answer anything about me or about the program.

Warmly,
Batool Al-Atrash

A PROPOSED PLAN FOR MY FIVE PERIODS

#	Team	What I would work on	What I bring
1	**Social media**	Plan and design posts, learn the content calendar	Photoshop and post design
2	**Content and production**	Assist on shoots and edits, write captions and scripts	Storytelling and hooks from Al-Balqa
3	**Influencer marketing**	Research creators, track results in a simple dashboard	Excel, research, Python dashboard
4	**Web and app development**	Prototype pages, build small tools (periods 4 and 5 where I grow most)	Website prototypes, a web system
